

FLANDERS S. LORTON

Senior Fullstack Software Developer

flanders.lorton@gmail.com - (720) 771-6574

www.flanderslorton.com - github.com/florton

Senior Fullstack Developer with 8+ years of experience building and scaling full-stack web applications using React, TypeScript, Node.js, and Go. Proven track record architecting microservices and APIs for production education platforms serving K-12 students. Strong background spanning frontend, backend, and DevOps, with hands-on experience in GraphQL, gRPC, and cloud deployment with AWS and Vercel.

EDUCATION

Bachelor of Science, Computer Science with Honors, Loyola Marymount University (LMU)

August 2017, Los Angeles, CA

University Honors Program, Cum Laude, Arrupe Scholar

PROFESSIONAL EXPERIENCE

Principal Fullstack Developer, Nelson Education US (formerly Finnarthur)

March 2018 – March 2026

- Led full-stack development of "Edwin," a K-12 educational platform serving thousands of students across Canada, rewriting the application from the ground up twice to modernize the architecture and improve maintainability
- Drove performance optimization initiatives across the stack — including caching strategies, pagination, lazy loading, payload size reduction, and MongoDB aggregation tuning — to reduce load times and cut redundant network requests
- Operated as one of two frontend developers for a multi-year stretch on an 8–10 person engineering team, shipping biweekly releases across the main application and supporting microservices
- Built and maintained backend microservices and APIs using GraphQL, gRPC, and Go (Golang), alongside continuous bug fixes and UX refinements to reduce user-facing issues and edge cases

Frontend Software Developer Intern, Taboola, Los Angeles

August 2017 – December 2017

- Shipped a content boost/block feature enabling customers to control content visibility across their clients' feeds, including new API endpoints
- Developed within an Agile/Scrum team using JS/React/Redux, Node.js, and Java Spring

Computer Science Tutor / Freelance Application Developer

May 2017 – August 2017

- Completed dozens of freelance and tutoring assignments, building applications and coaching clients/students across a range of programming languages and project types, from coursework to commercial applications

Computer Science Teacher's Assistant, LMU

August 2016 – May 2017

- Taught two sections of Introductory Java programming per year (~60 students per section, ~120 students/year total) over two consecutive years, covering clean code principles and functional programming fundamentals

COMPUTER SCIENCE SKILLS AND EXPERIENCE

JavaScript, TypeScript, ECMAScript, React, NextJS, Node.js, Express, HTML5, CSS3, Sass, Git, AJAX, Bash, REST APIs, Zustand, Redux, Redis, GraphQL, ESLint, gRPC, MongoDB, Go (Golang), Playwright, Python, SQL, Bootstrap, Heroku, Vercel, AWS, Docker, Godot, Mali, WebGL, Cursor, Claude Code
